Arizona House of Representatives

Phoenix, Arizona 85007

August 6, 1990

The Honorable William F. Reilly
Administrator
U.S. Environmental Protection Agency
401 M Street
Washington, D.C. 20460

Dear Mr. Reilly:

I serve as Vice Chairman of the Arizona House of Representatives Committee on Environment. I am fully aware that Arizona is under a mandate from the EPA to improve our air quality.

We recognize that the largest source of air pollution in this state results from motor vehicle exhaust emissions, and I would support fuel additives that reduce such pollution.

The Ethyl Corporation has developed and tested a product known as HiTEC 3000, an octane enhancer, which holds promise of reducing automobile emissions and thus air pollutants. I urge that your Agency give prompt consideration and evaluation to this product.

Sincerely,

A handwritten signature in cursive script that reads "Susan Gerard".

SUSAN GERARD
State Representative
